IF YOUR COMPANY HAS STRONG SECURITY POLICIES: If the plugin does not work after installation: Remove the plugin using in the standard way, and also clean its traces. You will need to delete entries in the Windows Registry: HKEY_LOCAL_MACHINE\Software\BSS LLC\BSS Multiplatform Plugin Version HKEY_LOCAL_MACHINE\SOFTWARE\BSS LLC\BSS Multiplatform Plugin HKEY_LOCAL_MACHINE\SOFTWARE\BSS LLC\BSS Multiplatform Plugin HKEY_LOCAL_MACHINE\SOFTWARE\BSS LLC\BSS Multiplatform Plugin Delete folder: C:\Users\account name\AppData\Roaming\BSS\BSSPlugin If the user works in a domain or with the limited user rights (not as Administrator), then before installing the plugin, try to give him temporary local administrator rights. It means permissions, not "*Run as Administrator*". Then the installer itself will make all the necessary changes and exceptions. Then, the rights can be removed. (!!!) At the time of installation / removal, you must close all browsers.
